Professional Summary

Results-driven Information Technology undergraduate with hands-on experience in full stack and back-end development. Proficient in Python, SQL, and Flask, with practical exposure to RESTful API development, database management, and web technologies. Experienced in developing real-time AI-based applications and data-driven systems, with a strong focus on building efficient, scalable, and reliable software solutions. Seeking opportunities to apply technical expertise and problem-solving skills in dynamic IT environments.

Education

Vels University, Chennai (2022–2026)	B.Tech in Information Technology — CGPA: 7.1
Pak Palanisamy Higher Secondary School	12th Standard — 70%
Pak Palanisamy Higher Secondary School	10th Standard — 59%

Technical Skills

Programming & Data: Python, SQL (CRUD, ETL)
Web Development: React.js, Django, HTML5, CSS3, JavaScript
Databases: MySQL, SQLite
AI Tools: ChatGPT, GitHub Copilot, Google Gemini, Claude
Cloud Platforms: AWS (Basics), IBM Cloud (Basics)

Experience

Shree Sai Tech, Coimbatore, Tamil Nadu

Full Stack Intern

Mar 2025 – May 2025

- Designed and implemented RESTful APIs using Flask, improving backend response times and service reliability. Developed and tested SQL queries to support full CRUD operations, optimizing database efficiency.
- Contributed to front-end feature development using HTML and CSS, and integrated interfaces with backend services. Gained hands-on exposure to cloud deployment concepts using AWS and IBM Cloud for small-scale applications.

Projects

Real-Time Sign Language Translation

Collaborated in a two-member team to develop a real-time **alphabet-level** American Sign Language (ASL) translation system. Implemented YOLOv8-based training, real-time webcam detection, confidence filtering, and a graphical user interface (GUI) for accurate recognition and translation of ASL alphabet gestures (A–Z).

Employee Management System

Developed a full-stack Employee Management System using **React.js, TypeScript, Bootstrap, Django, and Django REST Framework**. Implemented RESTful APIs for employee and department management with complete CRUD operations, authentication, employee search, and responsive dashboard features. Integrated the React frontend with the Django backend using the Fetch API and SQLite for efficient data storage and management.
